Artem Yakovlev

Senior Mobile Software Architect

Innovative and solutions-driven software programmer with over **10** years of experience. Proficient in all phases of the software development lifecycle, from concept to delivery of next-generation applications and customisable solutions, with a robust understanding of algorithms and data structures. Skilled in translating business requirements into technical solutions, with a strong commitment to quality, usability, security, and scalability. Exceptional project and team leadership abilities.

Specialising in mobile development since 2014, I possess extensive experience in developing mobile applications from inception to final release in app stores. Throughout my career, I have applied a variety of solutions and technologies. Excellent problem-solving skills and proven record of mentoring junior developers. Experience with cloud integration and backend services (Firebase, AWS, Azure). Skilled in CI/CD pipelines and automated testing frameworks

Educational Qualification

2017
Sep 2016 - Feb 2017

Master of Computer Science

Zaporizhzhya Institute of Economics and Information Technologies — **Zaporizhzhia, Ukraine**

Completed a rigorous curriculum focusing on advanced topics in computer science, including algorithms, machine learning, data structures, and software development.
Developed proficiency in various programming languages (such as Python, Java, C++, C#, Objective-C) and tools (e.g., Git, Docker, AWS), applying these in complex project environments.

2015
Sep 2014 - Jun 2015

Bachelor's Degree in Computer Science

Zaporizhzhya Institute of Economics and Information Technologies **Zaporizhzhia, Ukraine**

Acquired a solid foundation in computer science principles, including programming languages (like Python, Java, C), data structures, algorithms, and database management.
Gained hands-on experience in developing software applications, focusing on writing clean, efficient, and well-documented code in various programming environments.

2014
Feb 2008 - Jul 2014

Information Technology and Information Systems

Zaporizhzhya Institute of Economics and Information Technologies **Zaporizhzhia, Ukraine**

Developed a strong foundation in both technical aspects of IT (such as network architecture, database management, and cybersecurity) and business-focused information systems (including systems analysis, project management, and data analytics).
I gained hands-on experience designing and implementing technology solutions that align with business objectives, enhancing efficiency and effectiveness in organisational settings.
Proficient in analysing business requirements and designing corresponding IT solutions, focusing on optimising processes and improving overall system performance.
Acquired essential skills in managing IT projects, including planning, execution, monitoring, and closing, ensuring projects meet business needs within scope, time, and budget constraints.

Professional Skills

Programming Languages
